**JAWHORSE PORTABLE WORK STATION AND CLAMPING SYSTEM
HOLDS TIGHT WITH MORE THAN A TON OF GRIPPING FORCE**

Charlotte, N.C. — Builders and do-it-yourselfers often need an extra pair of helping hands on projects, such as hanging doors, installing drywall overhead, sawing 4 x 8-ft. plywood sheets or holding odd-shaped objects. Now, it's JAWHORSE™, from Rockwell® Power Tools, to the rescue.

The JAWHORSE is a heavy-duty, folding work station and clamping system like no other. Constructed of heavy-gauge, powder-coated steel throughout, the sturdy JAWHORSE can support up to 600 pounds. Yet, it weighs only 43 lbs. for easy portability. The wide-stance tripod design of the JAWHORSE keeps all three non-slip, rubber-padded feet firmly on the ground, even on uneven terrain. When open, it measures 39 in. L x 39 in. W x 35 in. H.

The JAWHORSE folds to 30 in. L x 14 in. W x 14 in. H., about half the size of a golf bag, and has a built-in wheel for easy transport. It fits conveniently into vehicles, closets or in a corner of your workshop or garage.

The JAWHORSE's, 8 in. x 3 in. steel jaws open to 37 in., which is wide enough to hold any standard door. With an optional Plywood Jaw™, you can secure a 4 x 8 ft. sheet of plywood. By pumping a foot pedal, the work piece is compressed to the desired tightness – up to 2,200 lbs. of gripping force. The foot pedal is equipped with a stirrup to prevent your foot from slipping, and the clamping jaw travels 1in. with each stroke of the pedal and can clamp at anypoint so it is infinitely adjustable and precise.

JAWHORSE Portable Workbench and Clamping System/Add One

“Anyone who has wrestled an awkward-shaped object or a full sheet of plywood onto a sawhorse understands the value of hands-free clamping,” said Craig Taylor, Positec Vice President of Brand Marketing. “The JAWHORSE takes the place of workbenches, stands, saw horses, vices and clamps. You can set up shop at the job site or in your garage. It’s also ideal for apartment dwellers and homeowners who don’t have a workshop or garage – just stow the JAWHORSE in a closet, then set up right at the project, on a patio or in the driveway.”

The JAWHORSE (\$199.97) is available on rockwelltoolsdirect.com and other popular websites, including amazon.com. It also is available through local retailers.

The usefulness of the JAWHORSE can be increased even more by adding exclusive add-on accessories designed to perform specific tasks, such as sawing logs and timber, creating a miter table complete with rollers, holding large sheets of material, welding and more. Customize the JAWHORSE by selecting from the following full line of optional accessories (sold separately):

Log Jaw (\$39.99) – features steel jaws that hold logs and timber up to 12 in. diam.

Miter Saw Station with Rollers (\$79.99) – fits a miter saw to the JAWHORSE.

Plywood Jaw (\$49.99) – adapts the JAWHORSE for sheet goods up to 52 in. wide.

Saddlebag (\$19.99) – holds tools and accessories within easy reach.

Welding Jaw (\$99.99) – secures welding work.

Clamping Work Table (\$69.99) – converts the JAWHORSE into a heavy-duty clamping work table.
