## **NEW ROCKWELL SONICRAFTER IS COST-EFFECTIVE DIY HELPER**

**Charlotte, N.C.** — The new Rockwell SoniCrafter™ with Microsonic™ technology is a remodeler's dream tool. This empowering power tool tackles a broad stroke of projects both indoors and out with ease. The Multi-functional tool saws, scrapes, sands, grinds, cuts, polishes and more. Applied Microsonic technology moves blades and other accessories side to side at an incredible rate of 20,000 oscillations per minute (opm). It can sever nails, but is extremely safe and precise because it uses the same technology employed by medical cast saws.

Skip the chisel when cutting mortises or making other hard to manage cuts, the SoniCrafter's end-cut blade will breeze through the project. Remove old grout from bathroom tiles, take rust to bare metal for priming a trailer, scrape leftover adhesive from a sheet vinyl floor when you don't dare use a slammer. Make intricate plunge cuts when precision counts. Name a weekend project and this tool will be a constant helper in reducing set up and production time.

"We view the SoniCrafter as the go-to tool for jobs that are too small or intricate for a traditional power tool, but too big for hand tools," said Craig Taylor, Vice President of Branding for Positec USA, Rockwell's parent company. "It's also one of the safest and easiest to control power tools you can use."

## Rockwell SoniCrafter/Add One

The tool's multi-accessory head accepts triangular shapes for sanding and polishing, carbide rasps, and circular and square-nosed cutting blades.

The tool features a lightweight magnesium gear housing and soft grip comfort handle with on/off slide switch, and weighs less than 3 lbs. The variable-speed machine has a no-load speed of 11,000-20,000 opm (oscillations per minute) and an oscillations angle of 1.6 degrees. The 2.3 amp power tool operates on standard 120 volt current and has an extra-long 10 ft power cord.

The Rockwell SoniCrafter (RK5102K, \$179.99) includes a Variable Speed Sonic-Crafter and a complete 71-piece assortment of the most popular accessories:

- **Vacuum Dust Extraction Adaptor** that helps collect any dust while cutting or sanding
- **Universal End-Cut Blade** for quick cuts in wood or metal
- **Semi Circle blade** for longer straight cuts and perfect corners
- **Carbide Semicircle Blade** for grout removal
- **Quick-change Hook and Loop Sanding Base** with 30 sheets of high-quality detail sanding paper (5 different grits)
- **Quick-change Hook and Loop Mini Sanding Base** for fine detail work with 30 sheets of mini sanding paper (5 different grits)
- **Triangular Carbide Grit Rasp** for quick removal of material (use on stone, brick, cement, thin-set and adhesives)
- **Scraper Blade** for scraping paint, cutting carpet and prying up old flooring
- **Two felt Polishing Pads** for polishing and finishing all types of materials
- **Accessory Adjustment Tool**

SoniCrafter also is available in a 37 pc kit for \$149 or as a 20 pc starter kit with a single-speed version at \$119 from Rockwell at [www.sonicrafter.com](http://www.sonicrafter.com) and other online Websites, including Amazon.com. It also is available through Menards and various local retailers.
